A3D Secures Second Department of Defence Printing Purchase Order

Highlights:

- **A3D secures a second direct printing services Purchase Order with Australian Department of Defence for additively manufactured (AM) metal components**
- **Strengthens A3D's pathway to future opportunities within the Defence industry to provide further AM products**

Aurora Labs Limited ("A3D" or "the Company") (ASX:A3D), is pleased to announce the receipt of a second purchase order directly from the Australian Department of Defence. This new purchase order signifies the continued expansion of A3D's role in delivering cutting-edge 3D metal printing solutions to the Defence sector.

Under this order, A3D will produce advanced experimental metal alloy components using its industrial 3D metal printing processes. These components will be manufactured utilising the Company's expertise in laser powder bed fusion (LPBF) technology.

This development is a significant milestone in A3D's strategic push in the Defence and Aerospace markets, both key growth sectors for the Company. It reinforces the strength of the Company's industrial print services and highlights the growing trust and confidence placed in A3D.

The purchase order is valued at \$46,094.

Rebekah Letheby, CEO of A3D, commented "Securing this second order from Defence is a clear validation of our strategic focus on the Defence and aerospace markets. It reflects our commitment to innovation and delivering precision-manufactured components that meet the stringent demands of these critical industries.

We are building a strong relationship with Defence, and this latest order which follows the initial purchase order for first phase printed products received in June 2024, confirms A3D's growing role in supporting Australia's sovereign defence capabilities. Our team's deep knowledge in materials and metal printing processes ensures we are well positioned to continue expanding into these high value sectors."

With this second purchase order, A3D is on an upward trajectory, firmly aligning with Australia's defence industry base, and laying the groundwork for larger, more diverse projects in the future.
