## MCP™ Patent Granted for Australia

Aurora Labs Limited ("A3D" or "the Company") (ASX:A3D) is pleased to announce it has been granted a patent in Australia for a key part of its Multi-Layer Concurrent Printing™ (MCP) technology.

This follows recently granted MCP patents in China and Japan<sup>1</sup> and is key in A3D's strategy to identify and protect its novel technology over selected jurisdictions. The Australian granting demonstrates progression through the targeted regions for this category of the Company's IP. Further patents are at various stages of the grant process across additional jurisdictions, including the United States and Europe.

The granting of this patent comes as A3D launches an Intellectual Property Project, aimed at formalising the identification, capture, categorisation, preliminary valuation, protection and commercialisation potential of individual elements of IP associated with its unique suite of technologies.

Chief Executive Officer Peter Snowsill said;

"It's particularly rewarding to have Aurora's ability to innovate endorsed at home. Intellectual property is central to our future commercial success and provides a secure platform for our continued development."

Ends

Approved for release by the Company's Board of Directors.

## FORWARD LOOKING STATEMENTS

This announcement contains forward-looking statements which incorporate an element of uncertainty or risk, such as 'intends', 'may', 'could', 'believes', 'estimates', 'targets' or 'expects'. These statements are based on an evaluation of current economic and operating conditions, as well as assumptions regarding future events.

These events are, as at the date of this announcement, expected to take place, but there cannot be any guarantee that such events will occur as anticipated or at all given that many of the events are outside Aurora's control.

Accordingly, Aurora and the directors cannot and do not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this announcement will actually occur.
